

Power BI Sales Dashboard – Requirements

1. Identify the **Top 5 and Bottom 5 products** based on Sales, Profit, and Quantity Sold.
2. Analyze **sales trends over time** — daily, monthly, quarterly, and annually.
3. Show the **relationship between Sales and Profit**.
4. Allow users to **compare Sales, Profit, and Quantity Sold between any two selected time periods**.
5. Calculate the **average discount offered for each discount category**.
6. Display the **total number of orders**.
7. Show **Sales, Profit, Discount, Net Sales, and other relevant fields** for each order, with filtering options using **Product, Date, Customer ID, and Promotion Category**.
8. Analyze and visualize **Sales performance across different cities**.
